

## **UP BUSINESS INCUBATOR FOR IT**

### **Observation:**

The incubator helps new technology businesses get started by providing guidance, resources, and continuous support. It serves as an environment where innovative ideas are developed and transformed into viable companies.

### **Learnings:**

With proper guidance and access to the right resources, new businesses can grow more efficiently. Collaborating with experienced mentors and professionals helps startups avoid common mistakes and increases their chances of long-term success.

## **DYNATA PHILIPPINES INC.**

### **Observation:**

Dynata gathers large amounts of data to help businesses better understand their customers. It provides real-time insights that companies can use to make informed and strategic decisions.

### **Learnings:**

Having access to accurate and up-to-date information enables companies to make better business choices. Understanding customer preferences and opinions is essential in developing successful products and services.

## **MATA TECHNOLOGIES, INC**

### **Observation:**

Mata Technologies uses virtual reality (VR) to allow people to explore places without physically being there. This is especially useful for tourists and individuals who are interested in viewing properties before visiting or purchasing them.

### **Learnings:**

Virtual reality is a powerful tool that enables people to experience locations and products from a distance. It helps users make better decisions by allowing them to see and understand what places or properties are like before they visit or buy.

## **T.A.R.S.I.E.R 117**

T.A.R.S.I.E.R. 117 provides 24/7 emergency response services to ensure that people receive immediate assistance during accidents, disasters, and medical emergencies.

### **Learnings:**

Having a fast and reliable emergency response service is crucial in saving lives. The quicker help arrives, the better the chances of positive outcomes for people in emergency situations.

## **RIVAN IT CEBU**

### **Observation:**

Rivan IT Cebu focuses on advanced areas in information technology such as Cyber Security, Network Engineering, and DevOps. By providing structured training and skill development opportunities, the company prepares individuals to succeed in the fast-changing IT industry.

### **Learnings:**

The IT industry is fast-paced and constantly evolving. Proper training and continuous learning are essential to keep up with industry demands. Rivan IT Cebu helps individuals gain the necessary skills to succeed in in-demand IT fields and contribute to the growth of the technology sector.
